FOR IMMEDIATE RELEASE:

Geoff B Associates can offer a CPD accredited training programme "Standards, Specifications and Testing".

This training programme introduces Standards, Specifications and Test Requirements within a framework of; Corrosion Principles, Forging, Casting and Heat Treatment Processes; used in the manufacture and alloy selection of components.

The training programme is suitable for engineers, QA inspectors, internal / external sales and commercial personnel who require familiarity with, NACE, Norsok and API Specifications in the manufacture of forged or cast; heat treated components.

The programme can be tailored to specific material requirements:

- Carbon and Alloy Steels
- Martensitic Stainless Steels
- Austenitic Stainless Steels
- Duplex and Super Duplex Stainless Steels
- Nickel Base Alloys

The programme can be tailored to suit specific process requirements:

- Continuous casting and heat treatment
- Foundry casting and heat treatment
- Forging and heat treatment

A Pre-Test and Post-Test are included for assessment of learning and achievement of suitable outcomes.

Participant's comments included; "excellent course, clear, precise and informative", "a better insight into understanding and compliance with customer specification requirements", "
