

Financial Support Available for Yorkshire & Humber Companies

The European Regional Development Fund (ERDF) has approved The National Metals Technology Centre (NAMTEC) to source companies that are looking for funding to support a new development in their business, offering up to 50% of eligible costs.

Contact **Graham Small** at NAMTEC
graham.small@namtec.co.uk

Could you benefit? See below for further details:

The type of development

- Product and process creation or improvement (better, smaller, faster, cheaper)
- Market analysis for market growth or diversification
- Technology change
- Optimisation of factory layout

The type of business

- You should be in engineering (excluding electronics, software and food)
- You can consider collaboration – pool your resources to maximise outputs

The delivery

- You will work with an approved third party (this may be from a regional University or Research and Technology Organisation (RTO) like NAMTEC, TWI or Casting Technology International).
- You do have a choice and support is available.

The value

- Typically projects are in the 5-10K range with short, high impact results that benefit you directly
- The development must show a measurable difference to your business – such as new jobs created, safeguarding existing jobs and/or increased sales

The process

- A short application form
- An answer within 2 weeks
- Support from us to get it right first time

We know that operating a business is tough right now. But we have proof that making changes to the status quo can add real value to your bottom line. Speak to us and we can talk through this particular fund and in general how NAMTEC can support you moving forward.

“ The research carried out was of the highest order. The only work left for us to do is make use of information generated, and take our first steps into the marine renewables market. ”
